

TRY TO:

- Take your micro and econometrics core (100 and 120 series).
- Make your final choice of major. Be sure your choice aligns with your talents and passions.
- Consider adding a minor in math, computer science, or accounting.
- Meet with the Vice Chair of Undergraduate Education during their [open office hours](#) if you are considering graduate or business school.
- Check out the [American Economics Association](#) web page which includes earnings data by major, advice on how to prepare for grad school in economics, and careers for those with economics degrees.
- Start thinking about whether you want to go to grad school, business school, or get a job.

START YOUR PLANNING

SECOND YEAR

JOBS/INTERNSHIPS

- Search for a summer job/internship using [Handshake](#) and Career Services Center [Internship Supersites](#).
- Prepare and polish your resume, and get help with your [interviewing skills](#) at the Career Services Center.
- Check [EconUGBlog](#) for jobs/internships from employers specifically targeting our majors.
- Visit the [Academic Internship Program](#) to find out about internships for academic credit.
- PRO-TIP: Many companies look for interns in Aug/Sept. Look for internships on [EconUgBlog/Handshake](#) over the summer!

OPPORTUNITIES

- Visit the [Study Abroad office](#) for information on different programs. Many courses can fulfill major electives!
- Doing well in upper-division core courses? Take our [one-unit honors courses](#). These small classes are designed to deepen your core knowledge, help you get to know faculty, & develop your presentation/writing skills. (3.5 GPA required)

BUILD YOUR RESUME

Possibly obtain an internship or a leadership position in a student org.
